Three USF Online Programs Rank in Top 25 Nationally
Two USF programs recognized by U.S. News & World Report as the best among Florida's public universities

TAMPA, Fla. (Jan. 12, 2016) – In new rankings released Tuesday by U.S. News & World Report, three University of South Florida online graduate programs appear in the top 25 nationally, including two showing substantial improvement from last year. Two USF programs, graduate computer information technology and graduate engineering, rank the highest among public universities in Florida.

According to U.S. News, the 2016 "Best Online Programs" rankings are based on a number of factors, including student engagement, faculty credentials and student services and technology.

"The University of South Florida is proud to have three programs included within the Top 25 of U.S. News and World Reports' national rankings of online programs," said USF Provost and Executive Vice President Ralph Wilcox. "These online STEM and business focused graduate degrees are a critical component of our strategic effort to increase student access and provide high-quality programs that align degree offerings and workforce needs. The university remains committed to maximizing career readiness and advancement, together with ensuring that our students graduate well prepared and ready to compete successfully in the global workforce."
